the ShoreLine for LAB

Date: *May 2016* | **Topic:** *LabConnect Update*

RESULT TRENDING

Seacoast is proud to announce the addition of Result Trending to LabConnect3! Result Trending offers a quick view of both current and historical Results, in an easy to interpret chart. Select from either the Line or Bar Graph format. The Graph includes the Reference Range for the assay, as well as Collected Date for each plotted Result. In addition, all charted Results are tabulated in the associated grid view.

Trending is a useful tool for monitoring any type of serial result, such as PT/INR, Hemoglobin A1C, or markers such as CA-125 and PSA.
