

# SurroundLab™ Toxicology

Enjoy the benefits of an integrated and **full featured LIS and AR solution** along with the specialized support required for servicing your toxicology and pain management business.

**Medication Tracking** by master patient ID, ensures you maintain an accurate medication history for the patient across all service dates and clients.

**Robust Reflexing** allows you to offer both standard reflex algorithms, as well as client, physician and even payer specific confirmation rules.

**Full Auditing** provides transparency to all aspects of the sample life, from cradle to grave.

**Integrated Quality Control** allows for analyzer performance verification before patient samples are processed.

**Drug Class** definitions allow you to group medications by class in support of reporting.

**Report Rules and Messages** allow you to include detailed information based on the patient's declared medications, including:

- ✓ Expected and Present
- ! Unexpected and Present
- \* Expected and Absent

**Integration with SurroundLab AR** allows additional up front checking, such as:

- ❖ ABN
- ❖ Bad Debt Warnings
- ❖ Patient Owed Balance Notifications

**Robust Implosion Logic** to handle drug classes, including the ability to rollup different test panels to the same CPT (including those with the same CPT) to one panel CPT for billing and pricing.

**Payer-Specific Overrides** to bill a HCPCS code in lieu of a CPT for a drug screen.

**Medically Unlikely Edit** (MUE) handles the separation of the maximum quantity of CPTs per line to meet Payer requirements
