PATIENT PAYMENT PLANS

Increase collections on Patient owed balances with flexible Payment Plan options; fully integrated with Easy Pay for seamless payment transactions.

Seacoast is proud to announce the recent release of our new Patient Payment Plan module for SurroundLab AR. This new module provides laboratories with another payment option to offer their patients with high co-pays, deductibles or patients that self-pay for services. The Payment Plan module integrates seamlessly with our web based patient portal, Easy Pay, allowing patients access to view and track their payment schedule and history.

Patients are reminded of upcoming payments automatically, via email, saving you time and postage costs. In addition, all payments processed via the Easy Pay portal are automatically posted in SurroundLab AR, saving processing steps and increasing operational efficiency.

The Patient Payment Plan module provides flexible payment plan options allowing you to help your patients find a comfortable payment arrangement within your organization's collection policies. For example, you can limit the number of allowed payment months, or set a minimum amount for which the patient arrangement can be offered, by using the configuration settings that you control.
